

Synchronize Data Across Platforms

Take advantage of using applications in multiple locations using various interfaces.

Classic way to access e-mail

- Fat Client (Outlook, Thunderbird, etc.)
- Problem is your data is stuck at a single computer
- Contacts are not accessible away from that computer

C

Google Mail (Gmail)

- Access your e-mail and contacts from any computer on the Internet
- Clean interface

Portable Gmail

- Using your smartphone you can access your e-mail from anywhere
- Synchronize your contacts between your phone and your Gmail account
